Criterion	Below Expectations	Meets Expectations	Exceeds Expectations
Code	One or more of the following are true (as applicable): 1) The code does not look like it would run. 2) The code does not solve the problem asked, or is unnecessarily complex.	The code is clear, and runs correctly if I try to run it.	The code is extremely well-written and creative. I learned a few new coding tricks from it!
Concepts and approach	The approach is wrong. The student is not able to justify their solution.	The student has a good understanding of the concepts and is able to justify their approach	In addition to getting the mandatory exercises right, the student has made a strong attempt at the extra credit sections of the assignment (if any), or gone beyond the questions asked of the data to uncover other interesting insights.
Communication	The code has no documentation or explanation where it might help.	The code has clear documentation/explanation where necessary.	In addition to documenting code, the student has written a README on github or a project summary that makes it really easy to understand their work.
